### BARBED WIRE IN WAR.

futting Up and Cutting Down Barriers le Perilous Work.

The erection of war entanglements, even when the trenches are some distance apart, is at all times dangerous. The men sllp over the parapet and in the first place pound in the supports with mallets, the heads of which are carefully wrapped in cloth in order to deaden the sound. Two other men carry the wire drum-a wooden cylin-

der round which the wire is rolled-

by means of a long pole through the

center, and a comrade attaches the wires to the supports. The work is slow and nerve strain ing, says a writer to the London Graphic, for star shells burst often and sompel the men to crouch low and remain motionless until the flare burns

TRAVIS LYNCH IMPROVING

Fay Davis received a letter today tating that Travis Lynch, who was injured at the Tonopah Extension mine, is a patient at the Hahnnenan hospital in San Francisco where he was operated on for a broken back and is getting along finely. It was expected that paralysis would ensue after the operation but nothing more than a slight attack was felt and individual incomes, forecasting retenthe physicians are encouraged to look for a complete recovery. The next ten days will tell the story.

Learn History by Novels. In the Woman's Home Companion

Anne Bryan McCall says: "One of the pleasantest ways I know of making varied travels into history is by reading historical novels. I remember that when I was twelve years old I read Harrison Ainsworth's 'Windsor Castle, and when I was fifteen I read Scott's 'Kenliworth.' When I was sixteen I read Hawthorne's 'Scarlet Letter.' I was not thinking of history at all when I read them. I read them solely for the story. Yet from those three books I learned more of the times of Henry VIII and Queen Eligabeth and of early American days, do believe, than in the many historical chapters covering those times that I have read since. Those books made these times live for me, and it was as though I myself were living in them."
